

# **PET CEMETERY, 35 – 1**

## **Summary Report**

This cemetery is located in the Northwest Quarter of Section 21, Township 4, Range 1 West. It is near the Landman Cemeteries, north of the west end of Gray Road. There appears to have been no recent burials of pets in the cemetery, so it may be no longer in use, and it appears to be full. No research was done regarding the families who owned the pets, but some markers give surnames, and one has “dog tags” with a number. Photos of each grave and marker were made during several visits to the cemetery. Generally, the photos were taken in a sequence from the west end to the east end of the cemetery, and they are arranged in that same sequence (as photographed) herein. The photos are basically displayed here without commentary.
