The 1930 census record below gives John E. Jones as age 63, with wife Lillian as age 46. It states that he was first married at age 27 (agrees with 1900 record), whereas she was first married at age 18. That first marriage age doesn't fit for Rachel, the wife shown in 1880. Likewise, it doesn't fit for the wife of the 1910 census. It does indicate that Lillian was married to someone else before she married John Jones, because she was between 32 and 42 years old when she married him, according to deductions from the census data of 1910 and 1920. In 1930, John Jones is still living in the town of Madison.
