Note that the 1910 census record shows that Sallie was born in Mississippi. No other census record found for her shows that she was born anywhere but Alabama. By 1910 she has also had another child since the 1900 record, by the notation of 12 children born. However, still only 9 were living at the time of the 1910 enumeration. A check of the children's names (for those young enough to still be living at home with their parents) indicates that son Paul had died between 1900 and 1910. His tombstone shows that Paul died in 1906. (View at 200% zoom to see details.)
